	Global Sustainability	-			

1. Green Star - Communities is a rating tool that evaluates the sustainability attributes of the planning, design, and construction of large scale development projects, at a precinct, neighbourhood, and/or community scale. Visit <http://www.gbca.org.au/green-star/green-star-communities/>

2. ISO 26000 is an international standard that provides guidance on the underlying principles of social responsibility, and on ways to integrate socially responsible behaviour into an organisation. Visit <http://www.iso.org/iso/home/standards/iso26000.htm>

3. The Global Reporting Initiative (GRI) Sustainability Reporting Standards are the world's most widely used standards on sustainability reporting and disclosure, enabling businesses, governments, civil society and citizens to make better decisions based on information that matters. Visit <http://www.globalreporting.org>

4. The Sustainable Development Goals form part of the 2030 Agenda for Sustainable Development and aim to call for action by all countries, poor, rich and middle-income to promote prosperity while protecting the planet. Visit <http://www.un.org/sustainabledevelopment/>
